

## On Demand Customization Harbour Freight Gantry Crane With PLC Control System

### Our Product Introduction

for more products please visit us on [port-crane.com](http://port-crane.com)

#### Basic Information

- Place of Origin: Port Cranes
- Brand Name: Lucheng Co., Ltd
- Model Number: Port Cranes
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

#### Product Specification

- Applicable Scope: Loading And Unloading Of Goods At Ports Such As Seaports/inland Ports
- Increase Quantity: On Demand Customization
- Brand: Lucheng Co., Ltd
- Operation Form: Air Operation/remote Operation
- Type: Port Cranes
- Production Country: China
- Control System: PLC
- Lifting Height: 6---150
- Working Class: A5-A8
- Highlight: **customization harbour freight gantry crane, customization container gantry crane, plc container gantry crane**

## Product Description

### Product Description:

Our Harbour Cranes are designed to handle heavy lifting tasks with ease, thanks to their superior construction and advanced features. With a slewing speed of 1.5 revolutions per minute, these cranes can efficiently move goods from one location to another, making them an indispensable tool in any port operation.

One of the key features of our Port Cranes is their customizable color, allowing you to customize the cranes to match your company's branding or aesthetic preferences. This makes them an excellent choice for companies looking to enhance their brand image while improving their port operations.

Our Harbour Cranes are designed to withstand harsh weather conditions and heavy usage, making them ideal for use in any port environment. They are also easy to maintain and operate, ensuring that your operations run smoothly and efficiently at all times.

When it comes to port operations, our Port Cranes are the best in the business, delivering reliable and efficient performance that you can depend on. Whether you need to load or unload goods from containers, ships, or other vessels, our Harbour Cranes are up to the task.

So if you're looking for a reliable and high-quality Port Crane solution, look no further than our range of Harbour Cranes. With their superior construction, advanced features, and customizable color options, they are the perfect choice for any port or logistics company.

### Features:

Product Name: Port Cranes

Control System: PLC

Model: LHM 420

Slewing Speed: 1.5 Revolutions Per Minute

Increase Quantity: On Demand Customization

Applicable Scope: Loading and Unloading of Goods at Ports such as Seaports/Inland Ports

Harbour Cranes, Harbour Cranes, Harbour Cranes

### Technical Parameters:

Operation Form	Air Operation/Remote Operation
Increase Quantity	On Demand Customization
New and Old Degree	Brand New
Product Material	Steel Products
Type	Harbour Cranes
Slewing Speed	1.5 Revolutions Per Minute
Lifting Height	6---150
Production Country	China
Control System	PLC
Colour	Customizable

### Applications:

The Port Cranes have a lifting height ranging from 6 to 150 meters, which makes them suitable for various applications. They can be used in different scenarios, such as loading and unloading cargo from ships, moving containers in the yard, and stacking containers in the storage area. The cranes can be customized according to the customer's requirements, and the increase quantity can be adjusted as per the demand. This feature makes the cranes versatile and adaptable to different working conditions.

The Port Cranes are widely used in ports and harbours all over the world. They play a crucial role in the logistics and transportation industry, enabling the efficient movement of goods and materials from one place to another. The cranes are designed to handle different types of cargo, including containers, bulk cargo, and heavy machinery. They are also used for ship-to-ship transfers, which is a critical operation in the shipping industry.

The Port Cranes are suitable for different application occasions, such as container terminals, bulk terminals, and general cargo terminals. They can also be used in industrial facilities, such as steel plants, power plants, and chemical plants. The cranes are designed to operate in harsh environments, such as extreme temperatures, high winds, and heavy rain. They are also equipped with safety features, such as anti-collision systems and overload protection, to ensure the safety of the workers and the cargo.

In conclusion, Port Cranes are essential equipment for ports and harbours. Lucheng Co., Ltd is a reliable manufacturer of high-quality Harbour Cranes in China. These cranes are versatile, adaptable, and suitable for different application scenarios. They are designed to handle different types of cargo and operate in harsh environments. The cranes are equipped with advanced technology and safety features to ensure their durability, reliability, and safety.

### Customization:

### Support and Services:

Our Port Cranes are designed to provide reliable and efficient performance for loading and unloading operations in ports and terminals. We offer a range of technical support and services to ensure the optimal performance of our products, including:

- Installation and commissioning
- Preventive and corrective maintenance
- Operator training and certification
- Remote monitoring and diagnostics
- Spare parts and component supply
- Upgrades and modernization

Our experienced technical team is available to provide support and assistance throughout the lifespan of our products, helping to minimize downtime and maximize productivity.
