

Versatile Harbour Cranes With 6m-150m Lifting Height And 1.5 RPM Slewing Speed

Our Product Introduction

for more products please visit us on port-crane.com

Basic Information

- Place of Origin: Shandong Province, China
- Brand Name: Lucheng Co., Ltd
- Model Number: Port Cranes
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Control System: PLC
- Product Material: Steel Products
- Production Country: China
- Brand: Lucheng Co., Ltd
- Model: LHM 420
- Increase Quantity: On Demand Customization
- Slewing Speed: 1.5 Revolutions Per Minute
- Colour: Customizable
- Working Class: A5-A8
- Highlight: versatile harbour cranes,
versatile container cranes, 6m harbour cranes

Product Description:

Features:

Product Name: Port Cranes
Lifting height: 6---150
Operation form: Air Operation/remote Operation
Slewing Speed: 1.5 Revolutions Per Minute
Type: Harbour Cranes
Increase quantity: On Demand Customization

Technical Parameters:

Product material	Steel Products
Colour	Customizable
Applicable scope	Loading And Unloading Of Goods At Ports Such As Seaports/inland Ports
Type	Port Cranes
Brand	Lucheng Co., Ltd
New and old degree	Brand New
Production country	China
Increase quantity	On Demand Customization
Operation form	Air Operation/remote Operation
Slewing Speed	1.5 Revolutions Per Minute

Applications:

The primary application occasions of port cranes include loading and unloading of cargo from ships, stacking of containers in the port, and maintenance of ships and other equipment. In addition to these, port cranes can also be used for construction and demolition of structures in the port area. With their high lifting capacity and advanced control systems, port cranes are ideal for handling heavy and bulky cargo such as machinery, vehicles, and containers.

Port cranes can be operated in different forms such as air operation or remote operation. The air operation form is suitable for short-distance operations where the crane operator can directly see the load and the destination. On the other hand, remote operation is ideal for long-distance operations where the crane operator needs to be away from the crane for safety reasons. In remote operation, the operator controls the crane using a remote control device that sends signals to the crane's control system.

The scenarios where port cranes can be used are diverse. These cranes are commonly used in ports and shipyards for loading and unloading of cargo from ships. They can also be used for stacking of containers in the port, which is a common sight in modern container ports. In addition to these, port cranes can be used for maintenance of ships and other equipment, which requires lifting heavy machinery and parts. The high lifting capacity of port cranes makes them ideal for construction and demolition of structures in the port area.

Port cranes are equipped with advanced control systems such as PLC that enable precise and efficient operation. With their high level of automation, port cranes can reduce the risk of accidents and improve the overall productivity of the port operations. Moreover, the on-demand customization feature of port cranes makes them highly adaptable to different requirements of the customers.

Customization:

Attributes:

Slewing Speed: 1.5 Revolutions Per Minute

Product Material: Steel Products

Brand: Lucheng Co., Ltd

Production Country: China

Operation Form: Air Operation/remote Operation

Support and Services:

Our Port Cranes product comes with comprehensive technical support and services, designed to assist you throughout the entire lifecycle of your crane. Our team of experts is available to help you with installation, commissioning, and training to ensure you get the most out of

your product. We also offer ongoing maintenance and repair services to keep your crane running smoothly and safely. Additionally, we provide upgrades and retrofits to help you stay up-to-date with the latest technology and regulations. Our goal is to provide you with the highest level of customer satisfaction and support possible.
