Model: LHM 420

### Technical Parameters:

Product Attribute	Value
Type	Port Cranes
Brand	Lucheng Co., Ltd
Lifting Height	6 - 150 meters
Increase Quantity	On Demand Customization
New and Old Degree	Brand New
Control System	PLC
Operation Form	Air Operation/Remote Operation
Slewing Speed	1.5 Revolutions Per Minute
Production Country	China
Product Material	Steel Products

## Applications:

One of the most important Product Application Occasions for the LHM 420 Port Cranes is in the shipping industry. The cranes are used to move large containers from ships to docks, and vice versa, which is a crucial part of the logistics process. The LHM 420 Port Cranes can handle heavy loads, which makes them ideal for use in busy ports that handle a high volume of cargo.

Another Product Application Occasion for the LHM 420 Port Cranes is in the construction industry. These cranes can be used to lift and move heavy loads of building materials, such as steel beams and concrete blocks. This can help to speed up the construction process and make it more efficient.

The LHM 420 Port Cranes are also used in the manufacturing industry. They can be used to move raw materials and finished products around a factory or warehouse. The cranes can help to streamline the production process and reduce the risk of injury to workers.

Overall, the LHM 420 Port Cranes are versatile and can be used in a range of different scenarios. They are durable and reliable, which makes them a smart investment for any business that needs to move heavy loads. With their high-quality construction and Slewing Speed of 1.5 Revolutions Per Minute, the LHM 420 Port Cranes are a top choice for any business in need of Harbour Cranes.
