## Product Description

### Product Description:

Harbour Cranes are essential for port operations, and the LHM 420 model is designed to provide exceptional performance. With a lifting capacity of up to 124 tons, these cranes are perfect for handling heavy loads. The crane's advanced technology allows for precise and efficient movement, making it an ideal choice for ports looking to improve their efficiency.

Customization is key when it comes to port cranes, and the LHM 420 model is no exception. The crane's color is customizable, allowing ports to match their machinery to their branding or surroundings. Lucheng Co., Ltd also offers excellent customer service, ensuring that any customization needs are met.

Investing in a new harbour crane can be a significant expense, but the performance and durability of the LHM 420 make it a wise investment. These brand new cranes offer the latest technology and are built to withstand the harsh conditions of port operations.

Overall, the LHM 420 Harbour Cranes from Lucheng Co., Ltd are an excellent choice for ports looking to improve their operations. With a lifting capacity of up to 124 tons, advanced technology, and customizable color, these cranes are a top-of-the-line option. Plus, the brand new degree ensures that ports are investing in high-quality equipment that will last for many years to come.

### Features:

Product Name: Port Cranes

Product material: Steel Products

New and old degree: Brand New

Production country: China

Model: LHM 420

Type: Harbour Cranes

Keywords: Harbour Cranes, Harbour Cranes, Harbour Cranes

### Technical Parameters:

|                     |   |
|---------------------|---|
| Brand:              | Lucheng Co., Ltd  |
| Model:              | LHM 420   |
| Control System:     | PLC   |
| Slewing Speed:      | 1.5 Revolutions Per Minute  |
| Production Country: | China   |
| Product Material:   | Steel Products  |
| Operation Form:     | Air Operation/remote Operation  |
| Applicable Scope:   | Loading And Unloading Of Goods At Ports Such As Seaports/inland Ports |
| New and Old Degree: | Brand New   |
| Increase Quantity:  | On Demand Customization   |

### Applications:

The lifting height of this Port Crane ranges from 6 to 150 meters making it suitable for various loading and unloading requirements. The LHM 420 model can handle a maximum weight of up to 124 tons which makes it ideal for heavy-duty lifting operations.

The Port Cranes product is perfect for a variety of application occasions and scenarios. It can be used for loading and unloading containers from ships, as well as for moving heavy machinery and equipment. The LHM 420 model can also be used for offshore operations, such as loading and unloading oil rigs, and for construction projects that require heavy lifting.

With its Air Operation/remote Operation features, the LHM 420 model can be used in hazardous environments, making it suitable for use in chemical plants and oil refineries. Additionally, the Port Cranes product can be used in warehouses and logistics centers for loading and unloading goods from trucks and containers.

In conclusion, the LHM 420 model of Port Cranes is a versatile and durable product that can be used in a variety of application occasions and scenarios. Its Air Operation/remote Operation features make it easy to operate from a distance and its lifting height range and weight capacity make it suitable for heavy-duty lifting operations. Whether it's loading and unloading cargo at a port or moving heavy machinery and equipment, the LHM 420 model of Port Cranes is a reliable and efficient solution.

### Customization:

### Support and Services:

Our company offers comprehensive technical support and services for our Port Cranes product. Our team of experienced technicians is available to provide on-site installation, maintenance, and repair services to ensure that your equipment is always operating at peak performance. We also offer remote technical support for troubleshooting and problem-solving, as well as training programs to help your staff learn how to operate and maintain the equipment safely and efficiently. Our goal is to provide you with the highest level of support and service to minimize downtime and maximize productivity.
