Product Description

Product Description:

The LHM 420 is made with high-quality steel products, ensuring durability and longevity. With its superior strength and stability, it can handle heavy loads with ease, making it the ideal choice for port operations.

One of the best features of the LHM 420 is its on-demand customization. This means that customers can order the crane to their specific requirements, ensuring that it meets their unique needs. Whether it's adjusting the height, length, or weight capacity, the LHM 420 can be customized to suit any job.

The LHM 420 is ideal for use in seaports and inland ports, providing efficient and reliable loading and unloading of goods. Its advanced technology and precision control system make it easy to operate, even in challenging weather conditions. Its high lifting capacity and flexible boom system allow it to handle a wide range of cargo, from containers to heavy machinery.

In addition to its exceptional performance, the LHM 420 is also designed with safety in mind. Its advanced safety features, such as anti-collision systems and automatic overload protection, ensure that the operator and surrounding personnel are protected at all times.

Overall, the LHM 420 Port Crane from Lucheng Co., Ltd is an excellent investment for any port operation. Its durability, customization options, and advanced technology make it a top-performing product in the market. If you're in need of a reliable and efficient Harbour Crane for your port operations, the LHM 420 should be your top choice.

Features:

Product Name: Port Cranes

Applicable Scope: Loading And Unloading Of Goods At Ports Such As Seaports/Inland Ports

Lifting Height: 6---150

Brand: Lucheng Co., Ltd

Slewing Speed: 1.5 Revolutions Per Minute

Colour: Customizable

Harbour Cranes, Harbour Cranes, Harbour Cranes

Technical Parameters:

Type	Port Cranes
New and old degree	Brand New
Applicable scope	Loading and Unloading of goods at ports such as seaports/inland ports
Control System	PLC
Lifting height	6---150
Product material	Steel Products
Operation form	Air Operation/remote Operation
Colour	Customizable
Brand	Lucheng Co., Ltd
Slewing Speed	1.5 Revolutions Per Minute

Applications:

Port Cranes are ideal for use in various scenarios, including:

Ship-to-ship transfers: These cranes are used to transfer cargo between two ships docked side by side.

Ship-to-shore transfers: They are used to transfer cargo between a ship and the port or dock.

Container handling: These cranes are capable of handling containers of varying sizes and weights, making them ideal for container terminals.

Bulk cargo handling: They are also used for handling bulk cargo such as coal, grain, and ore.

Heavy lift operations: Port Cranes are capable of lifting heavy loads, making them ideal for heavy lift operations such as loading and unloading heavy machinery.

In addition to these scenarios, Port Cranes can also be used for offshore operations such as oil and gas exploration and production. They are also ideal for use in shipyards for shipbuilding and repair operations.

Overall, Port Cranes, also known as Harbour Cranes, are a versatile and essential piece of equipment for any port or dock. Their ability to handle various types of cargo and lift heavy loads makes them ideal for a wide range of applications. If you are in need of a reliable and efficient Port Crane, look no further than this brand new product from Lucheng Co., Ltd.

Customization:

We offer product customization services for our Port Cranes. Our cranes are designed for loading and unloading of goods at ports such as seaports/inland ports. The control system of our Harbour Cranes is PLC, ensuring efficient and reliable operation. The colour of the cranes is customizable to match your branding or preferences. Our Harbour Cranes are designed to have a slewing speed of 1.5 revolutions per minute. Contact us to learn more about our product customization services and how we can tailor our Port Cranes to meet your specific needs.

Support and Services:

Our Port Cranes product comes with comprehensive technical support and services to ensure its optimal performance and reliability. Our team of experienced engineers and technicians are available to assist with installation, commissioning, maintenance, and repair of the equipment. We also offer training programs for operators and maintenance personnel to ensure safe and efficient operation of the cranes. In addition, we provide remote monitoring and diagnostic services to detect and troubleshoot any issues that may arise, minimizing

downtime and maximizing productivity. Our commitment to quality and customer satisfaction means that we are always here to support our customers throughout the lifecycle of their Port Cranes.
