

## Terminal Double Beam Eot Crane For Customizable Tonnage In Industrial 5-500T

Our Product Introduction

for more products please visit us on [port-crane.com](http://port-crane.com)

### Basic Information

- Place of Origin: China
- Brand Name: Double beam crane
- Model Number: complete
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

### Product Specification

- Tonnage: Customizable
- Increase Quantity: On Demand Customization
- Product Material: Steel Products
- New And Old Degree: Brand New
- Lifting Capacity: 5-500T
- Does It Support Processing Customization: Yes
- Operation Form: Remote-controlled Operation
- Brand: Lucheng Co., Ltd
- Working Class: A5-A8
- Highlight: industrial double beam eot crane,  
industrial double beam bridge crane,  
500t double beam eot crane

## Product Description

### Product Description:

Our Double Beam Crane is designed with a lifting capacity of 5-500T, which means that it can easily handle even the heaviest loads. Whether you're lifting machinery, construction materials, or large-scale equipment, our crane is up to the task. The lifting height of our Double Beam Crane is also impressive, with a range of 0-50m. This means that it can easily reach high elevations and lift loads to great heights. Whatever the task at hand, our crane is sure to get the job done. At our company, we understand that every job is unique, which is why we offer customizable tonnage options for our Double Beam Crane. This means that you can choose the tonnage that best fits your needs, ensuring that you have the right crane for the job. Our Double Beam Crane is the perfect choice for any heavy-duty lifting job. Whether you're working on a construction site, in a manufacturing facility, or in any other industry that requires heavy lifting, our crane is up to the task. With its durable Steel Products construction, impressive lifting capacity, and customizable tonnage options, our crane is the best choice for any job that requires reliable and efficient lifting power.

### Features:

Product Name: Double Beam Crane  
Product material: Steel Products  
Lifting height: 0-50m  
Applicable scope: Industrial Factory Terminal  
Production country: China  
tonnage: Customizable

### Technical Parameters:

|                                  |                             |
|----------------------------------|-----------------------------|
| Product Name                     | Double Beam Crane           |
| Operation Form                   | Remote-controlled Operation |
| Increase Quantity                | On Demand Customization     |
| Production Country               | China                       |
| Product Material                 | Steel Products              |
| Brand                            | Lucheng Co., Ltd            |
| Processing Customization Support | Yes                         |
| Tonnage                          | Customizable                |
| New and Old Degree               | Brand New                   |

| Lifting Height                   | 0-50m                       |

### Applications:

**Manufacturing Industry:** The Double Beam Crane is commonly used in the manufacturing industry to move and lift heavy materials such as steel products, machinery parts, and other industrial components. The crane can be customized to fit specific needs and requirements, making it an ideal solution for many manufacturing applications.

**Construction Sites:** The Double Beam Crane can also be used in construction sites to lift and move heavy construction materials such as steel beams, concrete blocks, and prefabricated structures. The crane can be easily maneuvered around the site, allowing for efficient and safe lifting operations.

**Mining Industry:** The Double Beam Crane is also widely used in the mining industry to move and lift heavy equipment and materials such as ore, rocks, and machinery parts. The crane's robust design and customizable features make it a reliable and effective solution for mining applications.

**Transportation Industry:** The Double Beam Crane is commonly used in the transportation industry for loading and unloading heavy cargo, such as containers, pallets, and machinery. The crane's high lifting capacity and customizable features make it an ideal solution for many transportation applications.

**Power Plants:** The Double Beam Crane is also widely used in power plants for lifting and moving heavy equipment and materials such as generators, turbines, and transformers. The crane's sturdy design and customizable features make it an essential tool for power plant maintenance and repair operations.

Overall, the Double Beam Crane is a powerful and versatile lifting equipment that can be customized to fit specific needs and requirements. With its robust design and high lifting capacity, the crane is an ideal solution for many industries and applications. It is a complete product manufactured in China supporting processing customization and can be produced on demand with increased quantity. The product material is made from steel products, ensuring durability and reliability.

### Customization:

Model Number: complete  
Place of Origin: China  
Lifting capacity: 5-500T  
Increase quantity: On Demand Customization  
Lifting height: 0-50m  
Production country: China  
Brand: Lucheng Co., Ltd

## Support and Services:

The Double Beam Crane is a heavy-duty lifting equipment designed for industrial applications. It is built with two parallel beams that provide extra stability and strength to carry heavy loads. Our product technical support and services include:

- Installation and commissioning: Our team of experts can help with the installation and commissioning of the Double Beam Crane to ensure it is properly set up and ready for use.
- Maintenance and repair: We offer regular maintenance services to keep your crane in good working condition and extend its lifespan. We also provide repair services in case of any damages or malfunctions.
- Upgrades and retrofits: Our team can help upgrade your crane with the latest technologies and features, or retrofit it to meet changing production needs.
- Training and support: We offer training programs for operators and maintenance personnel to ensure safe and efficient use of the Double Beam Crane. Our support team is also available round the clock to answer any queries or concerns.

## Packing and Shipping:

The Double Beam Crane product is carefully packaged and shipped to ensure its safe delivery to your location. The product is first wrapped in a protective material to prevent any scratches or damage during transit. It is then placed in a sturdy cardboard box with ample cushioning material to absorb any shocks or impacts that may occur during shipping.

The shipping process is handled by our trusted logistics partners who have years of experience in handling heavy and delicate equipment. They use specialized vehicles to transport the product to your location, ensuring that it is delivered on time and in the best possible condition.

Once the product reaches your location, it is important to inspect it carefully for any signs of damage or defects. If you notice any issues, please contact our customer support team immediately and we will work with you to resolve the problem as quickly as possible.

## FAQ:

**Q: What is a Double Beam Crane?**

A: A Double Beam Crane is a type of overhead crane that has two parallel beams for lifting and transporting heavy loads. It is designed for industrial use and is commonly used in factories and warehouses.

**Q: What is the Model Number of the Double Beam Crane?**

A: The Model Number of the Double Beam Crane is complete. It is a customizable product and can be designed as per the specific requirements of the customer.

**Q: Where is the Double Beam Crane manufactured?**

A: The Double Beam Crane is manufactured in China. It is made with high-quality materials and components to ensure durability and reliability.

**Q: What are the benefits of using a Double Beam Crane?**

A: The Double Beam Crane provides a number of benefits, including increased efficiency, improved safety, and reduced labor costs. It can lift and move heavy loads with ease, making it ideal for industrial applications.

**Q: What is the weight capacity of the Double Beam Crane?**

A: The weight capacity of the Double Beam Crane can vary depending on the specific model and configuration. It can be designed to lift and transport loads ranging from a few hundred kilograms to several tons.
