

Remote Controlled Operation Double Beam Gantry Crane For Industrial Terminal Handling Needs

Our Product Introduction

for more products please visit us on port-crane.com

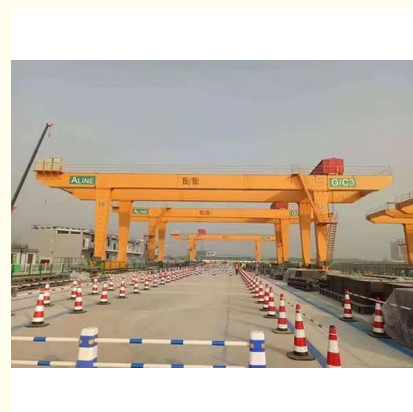

Basic Information

- Place of Origin: Shandong Province, China
- Brand Name: Lucheng Co., Ltd
- Model Number: Double Beam Crane
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Type: Double Beam Crane
- New And Old Degree: Brand New
- Product Material: Steel Products
- Increase Quantity: On Demand Customization
- Lifting Capacity: 5-500T
- Applicable Scope: Industrial Factory Terminal
- Production Country: China
- Tonnage: Customizable
- Working Class: A5-A8
- Highlight: industrial double beam gantry crane,
industrial double girder gantry crane,
handling double beam gantry crane

Product Description

Product Description:

One of the main features of the Double Beam Crane is its customizable tonnage which can be tailored to meet the specific needs of each customer. This means that customers can choose the tonnage that best suits their requirements, ranging from 5T to 500T. The increase quantity is also available on demand customization, which gives customers the flexibility to adjust the tonnage as their needs change over time.

Another key attribute of the Double Beam Crane is its lifting capacity. This crane can handle loads ranging from 5T to 500T, making it an excellent choice for heavy-duty lifting operations. The lifting capacity of the Double Beam Crane is enhanced by its dual beams, which provide greater stability and balance when lifting heavy loads.

The Double Beam Crane is designed to be used in industrial factory terminals where heavy loads need to be lifted and moved. Its robust construction and customizable tonnage make it an ideal solution for various applications, including manufacturing, construction, and logistics. Whether you need to move large machinery, equipment, or materials, the Double Beam Crane can handle the job with ease. In conclusion, the Double Beam Crane is a versatile and reliable lifting equipment that can be customized to meet the specific needs of each customer. Its steel construction, customizable tonnage, and lifting capacity make it an excellent choice for heavy-duty lifting operations. If you need a crane that can handle large and heavy loads, the Double Beam Crane is the perfect solution for your lifting needs.

Features:

Product Name: Double Beam Crane

Processing Customization: Yes

Lifting capacity: 5-500T

Production country: China

Lifting height: 0-50m

Increase quantity: On Demand Customization

Technical Parameters:

Product material	Steel Products
Increase quantity	On Demand Customization
Product type	Double Beam Crane
Brand	Lucheng Co., Ltd
Applicable scope	Industrial Factory Terminal
Production country	China
Lifting capacity	5-500T
Lifting height	0-50m
Operation form	Remote-controlled Operation
New and old degree	Brand New

Applications:

Manufacturing Industry: Double beam cranes are widely used in the manufacturing industry for lifting and transporting heavy machinery, equipment, and raw materials. They are especially useful in warehouses, assembly lines, and production facilities. The Double Beam Crane can be used to lift and move heavy loads from one location to another with ease, making it an indispensable tool in the manufacturing process.

Construction Industry: The Double Beam Crane is also used extensively in the construction industry for lifting and transporting heavy building materials like steel beams, concrete blocks, and pipes. It is an essential tool for building bridges, highways, and other large-scale infrastructure projects. With its remote-controlled operation, the Double Beam Crane can be easily maneuvered into position, making it the perfect solution for construction sites with limited space.

Mining Industry: The Double Beam Crane is also commonly used in the mining industry for lifting and transporting heavy equipment and materials. It is used to move equipment and supplies to different parts of the mine, and to lift and lower workers in and out of the mine shaft. The Double Beam Crane is designed to withstand the harsh conditions of the mining environment, making it a reliable and durable tool for mining operations.

Oil and Gas Industry: The Double Beam Crane is also used in the oil and gas industry for lifting and transporting heavy equipment like drilling rigs, pipelines, and storage tanks. It is an essential tool for offshore drilling platforms and onshore oil fields. With its remote-controlled operation, the Double Beam Crane can be easily operated from a safe distance, reducing the risk of accidents and injuries. The Double Beam Crane is a complete product that is manufactured in China with brand new components. It can be customized to meet the specific needs of different industries with on-demand customization options. As a double beam crane, it is capable of lifting and transporting heavy loads with ease, making it an ideal solution for various industrial applications. It supports processing customization, and its remote-controlled operation makes it a safe and efficient tool for any job.

Customization:

Support and Services:

The Double Beam Crane product technical support and services include:

- Installation guidance and support
- Technical troubleshooting assistance
- Maintenance and repair services
- Replacement parts and accessories
- Training for proper operation and safety measures
- Upgrades and customization options
- Warranty and after-sales support

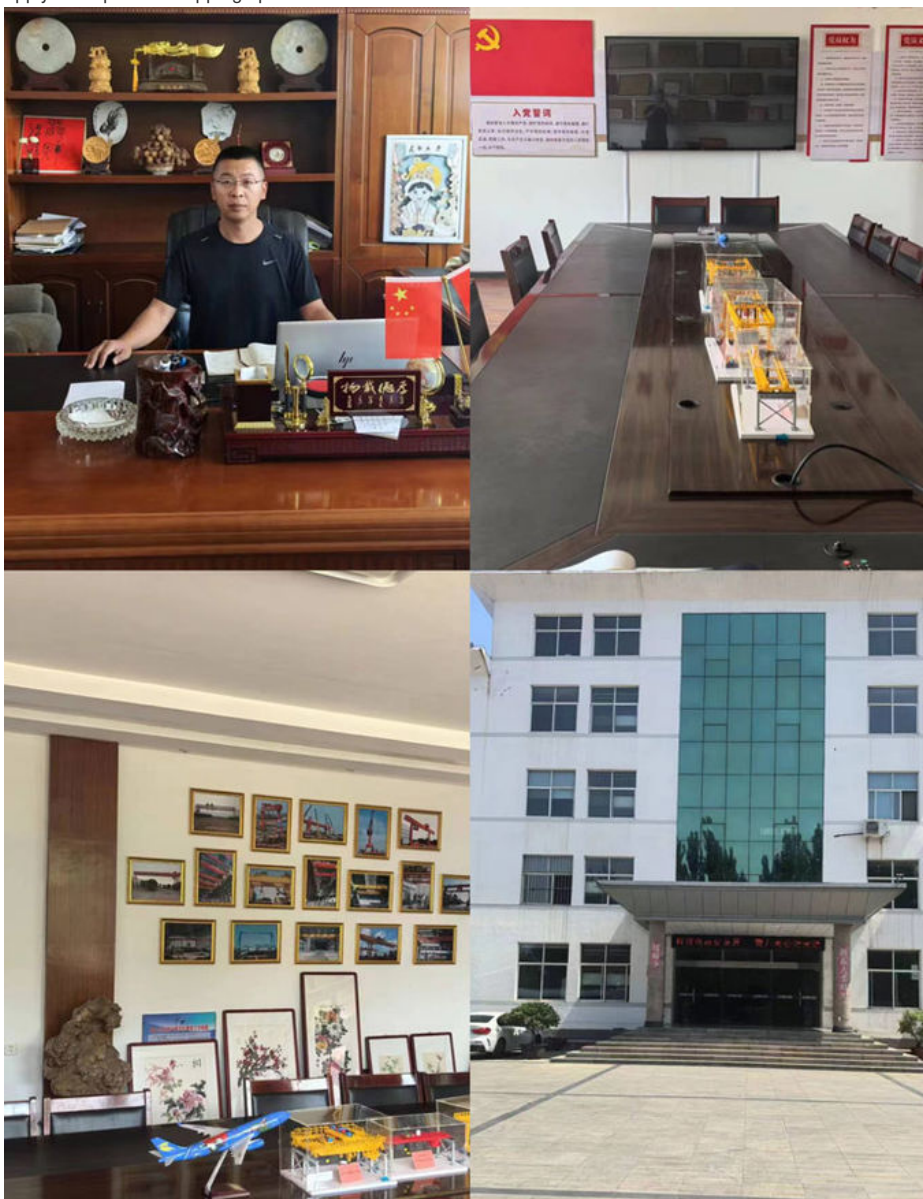

Packing and Shipping:

Product Packaging:

The Double Beam Crane will be securely packaged in a wooden crate to ensure safe transportation. The product will be disassembled and each component will be individually wrapped and cushioned to prevent any damage during shipping.

Shipping:

Our shipping partners will ensure prompt delivery of the Double Beam Crane to your doorstep. Shipping costs will be calculated based on your location and added to your order during checkout. Please note that due to the size and weight of this product, additional fees may apply for expedited shipping options.

FAQ:

Q: What is a Double Beam Crane?

A: A double beam crane is a type of overhead crane that utilizes two parallel beams to lift and move heavy loads. It is commonly used in industrial settings for material handling and transportation.

Q: What is the model number of the Double Beam Crane?

A: The model number for the Double Beam Crane is complete.

Q: Where is the Double Beam Crane manufactured?

A: The Double Beam Crane is manufactured in China.

Q: What are the weight limitations of the Double Beam Crane?

A: The weight limitations of the Double Beam Crane depend on the specific model and configuration. Please consult the product manual or contact the manufacturer for more information.

Q: What industries commonly use a double beam crane?

A: A double beam crane is commonly used in industries such as manufacturing, construction, mining, and transportation for material handling and transportation purposes.
