

European Style Electric Gantry Cranes With Light Weight Compact Structure And Low Energy Consumption

Our Product Introduction

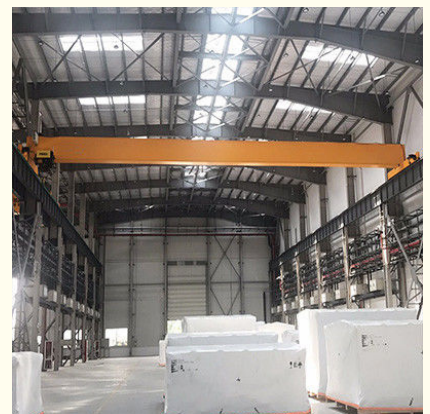

Basic Information

- Place of Origin: Shandong Province, China
- Brand Name: Lucheng Co., Ltd
- Model Number: European crane
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Production Country: China
- Brand: Lucheng Co., Ltd
- Type: European Style Crane
- Design Or Not: Design With Drawings
- Does It Support Processing Yes Customization:
- Product Material: Steel Products
- Sales Methods: Direct Deal
- Span: Customizable
- Color: Customizable
- Weight: Customized Kg
- New And Old Degree: Brand New
- Highlight: european style electric gantry cranes,
compact electric gantry cranes,
compact industrial gantry crane

Product Description

European style crane is a type of mid to high end gantry crane, and there is no concept of European style crane in professional terminology. It is a new definition of mid to high end gantry crane proposed by domestic crane users based on the characteristics of compact structure, light weight, energy saving, and low noise, combined with advanced European crane technology. It is a clear market demand and a summary of the reliability, universality, and low price of domestic cranes. The concept of European style cranes has emerged in the industry in recent years, with the aim of distinguishing them from traditional, Soviet style, and domestically produced cranes. Mainly including: bridge crane, gantry crane, cantilever crane, flexible beam crane, explosion-proof crane and other industrial cranes.

The European crane design concept and advanced manufacturing technology make the entire crane structure compact, operate smoothly, reduce its own weight, lower its height, save energy and reduce consumption, greatly reducing the construction cost of the crane operation plant and the crane operation cost for users, and improving the overall quality and operational performance of the crane. European style cranes will become the development trend and mainstream market demand for cranes.
