## Product Description

### Product Description:

The lifting height of our Electric Hoist is 17m, which makes it ideal for use in tall buildings. It can lift heavy objects to a considerable height, making it an essential tool for construction sites and manufacturing plants. It is designed to provide maximum efficiency and productivity, making it a reliable tool for any job.

Our Electric Hoist comes in two operation forms: Air Operation and Remote Operation. Air Operation is suitable for use in areas with limited access to electricity, while Remote Operation is ideal for use in areas with access to electricity. Both operation forms are easy to use and provide the user with full control over the load being lifted.

Our Electric Hoist is a type of lifting equipment that is commonly used in industries that require heavy lifting. It is designed to lift and move heavy loads with ease, making it an essential tool for any industry that requires heavy lifting. Our Electric Hoist is manufactured in China, a country known for producing high-quality equipment at an affordable price.
