Increase quantity: On Demand Customization

Production country: China

Operation form: Air Operation/remote Operation

Electric power: 7KW-60KW

Colour: Customizable

Technical Parameters:

Lifting height	17m
Applicable scope	Workshop Production Loading And Unloading
Production country	China
Tonnage	Customizable
Colour	Customizable
Product material	Steel Products
Electric power	7KW-60KW
Operation form	Air Operation/remote Operation
Type	Electric Hoist
Increase quantity	On Demand Customization

Applications:

The Electric hoist is an essential tool for lifting and moving heavy objects. It is commonly used in the construction industry for lifting materials to higher floors of a building. In the manufacturing industry, it is used in the assembly process to lift heavy machinery and equipment. It is also used in the automotive industry to lift engines and other heavy components.

The Electric hoist is an ideal tool for warehouses and storage facilities. It can be used to lift and move heavy boxes, crates, and pallets. It is also used in the transportation industry for loading and unloading cargo from trucks and ships.

The Electric hoist is also used in the entertainment industry for setting up stages and equipment. It is commonly used for lifting and moving lighting and sound equipment. It can also be used in the film industry for lifting and moving heavy cameras and equipment.

The Electric hoist is available in customizable colours, which makes it perfect for branding and promotional activities. The product supports processing customization, which means that it can be customized according to the user's specific needs.

In conclusion, the Lucheng Co., Ltd Electric hoist is a versatile and customizable product that finds its application in a wide range of industries. It is manufactured in China and can be customized according to the user's requirements. Whether you are in the construction, manufacturing, warehousing, transportation, or entertainment industry, the Electric hoist is an essential tool for lifting and moving heavy objects.
