

500T Capacity Electric Factory Overhead Crane Metallurgical Factory Crane

Our Product Introduction

for more products please visit us on port-crane.com

Basic Information

- Place of Origin: Shandong Province, China
- Brand Name: Lucheng Co., Ltd
- Model Number: Metallurgical crane
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Applicable Scope: Industrial Factory Terminal
- New And Old Degree: Brand New
- Lifting Height: 0-50m
- Main Material: Q235B/Q345B Steel
- Increase Quantity: On Demand Customization
- Production Country: China
- Power Supply: 3-phase AC, 50Hz, 380V
- Does It Support Processing Customization: Yes
- Highlight: **Electric factory overhead crane,
500T factory overhead crane,
Metallurgical Factory Crane**

Product Description

Product Description:

The Metallurgical crane is powered by a 3-phase AC, 50Hz, 380V power supply, providing sufficient power for efficient and reliable lifting operations. It has a lifting capacity of 1-500T, making it suitable for various applications in the metallurgical industry. This crane is built to handle heavy loads with ease, making it an essential tool for any metallurgical operation.

With its robust and sturdy construction, the Metallurgical crane can withstand harsh working conditions, such as high temperatures, dirt, and dust. Its advanced features and design make it easy to operate, ensuring maximum safety and productivity for the user. This crane is also equipped with advanced safety features, such as overload protection and emergency stop buttons, ensuring the safety of both the operator and the load being lifted.

The Metallurgical crane is a versatile and reliable lifting equipment that is essential for the efficient operation of any metallurgical facility. Its lifting capacity, durability, and safety features make it an ideal choice for various applications in the metallurgical industry. Whether you are handling heavy loads or working in harsh environments, this crane is the perfect tool for the job.

Features:

Product Name: Metallurgical crane

Production Country: China

Tonnage: Customizable

Applicable Scope: Industrial Factory Terminal

Main Material: Q235B/Q345B Steel

Lifting Height: 0-50m

Technical Parameters:

Product Attribute	Value
Product Material	Steel Products
Main Material	Q235B/Q345B Steel
Tonnage	Customizable
Lifting Capacity	1-500T
Effective Lifting Height	9-30m
Lifting Height	0-50m
Operation Form	Remote-controlled Operation
Production Country	China
Power Supply	3-phase AC, 50Hz, 380V
New and Old Degree	Brand New

Applications:

The Metallurgical crane is produced in China and is known for its high-quality and durability. It is designed to withstand harsh conditions and can be used in a variety of industrial settings. The crane is equipped with advanced technology and safety features, making it a reliable and efficient choice for any industrial application.

Metallurgical cranes are commonly used in industrial factory terminals, where they are used to lift and move heavy materials such as steel, iron, and other metals. They are also used in construction sites and other industries where heavy lifting is required. The crane can be used to transport materials from one location to another, and it can also be used to load and unload trucks and other vehicles.

The Metallurgical crane is ideal for a variety of applications, including the handling of raw materials, the transportation of finished products, and the loading and unloading of heavy machinery. It is a versatile and reliable piece of equipment that is essential for any industrial operation that requires heavy lifting.

Whether you are working in a factory, a construction site, or any other industrial setting, the Metallurgical crane is an excellent choice for your lifting needs. With its customizable tonnage, high lifting capacity, and advanced safety features, this crane is sure to meet your needs and exceed your expectations.

Customization:

Product Customization Services for the Metallurgical crane:

Lifting height: 0-50m

Main Material: Q235B/Q345B Steel

Brand: Lucheng Co., Ltd

Processing customization: Yes

New and old degree: Brand New

Choose the Metallurgical crane from Lucheng Co., Ltd and customize it to your needs with these options. Our product is made with high-quality Q235B/Q345B Steel and supports processing customization. Get your brand new Metallurgical crane today!

Support and Services:

Our Metallurgical crane product is designed for heavy-duty applications in the steel industry. It is equipped with advanced control systems and safety features to ensure efficient and reliable operation. Our technical support team is available to assist with any questions or issues you may have with the product. We provide installation, maintenance, and repair services to keep your crane operating at peak performance. In addition, we offer training programs to ensure your operators are properly trained on the safe and effective use of the crane. Contact us for more information on our product technical support and services.

Packing and Shipping:

Product Packaging:

The metallurgical crane will be packaged securely in a wooden crate to prevent any damage during transportation.

The crate will be labeled with the product's name, dimensions, weight, and handling instructions.

Any additional parts or accessories will be packaged separately and included in the same crate.

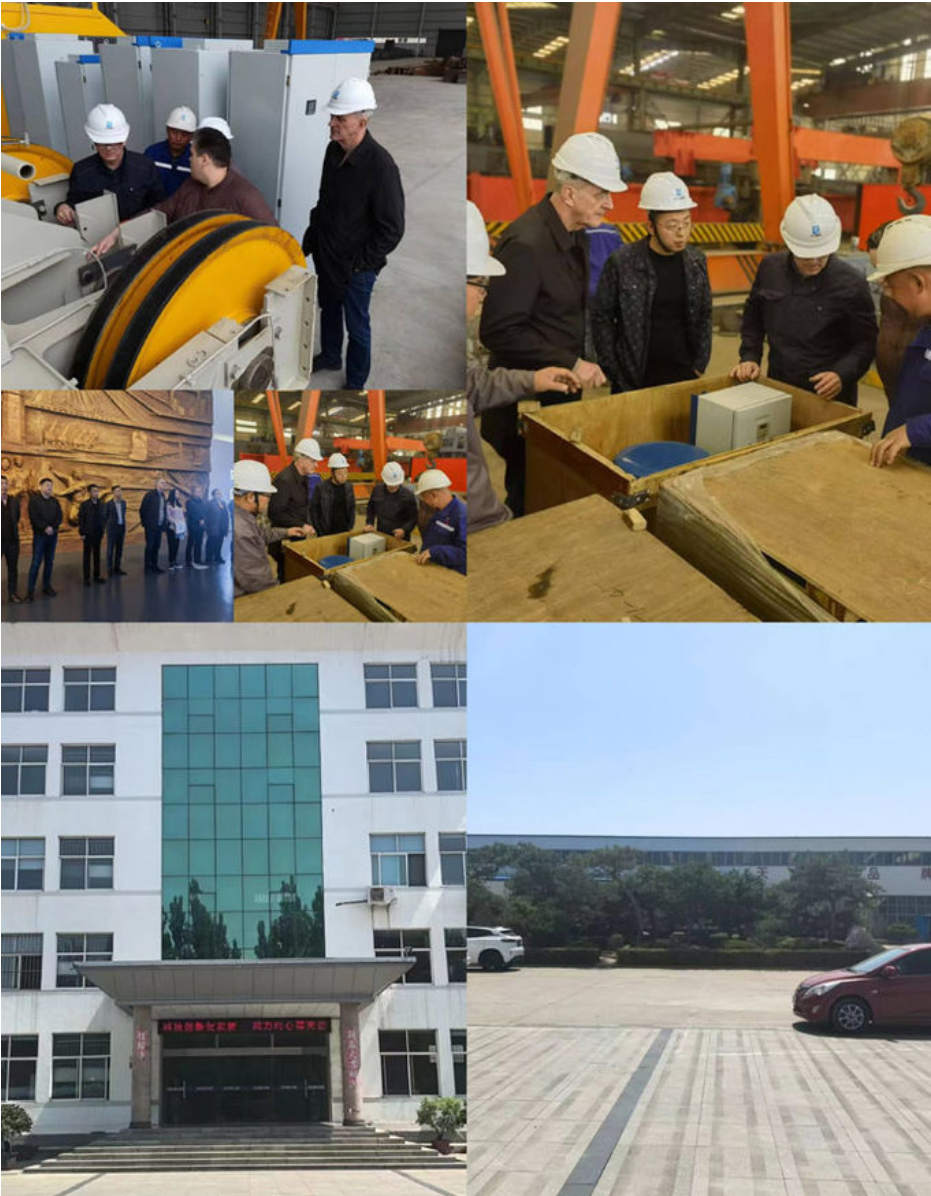

Shipping:

The metallurgical crane will be shipped via a reputable freight company.

The shipping method will depend on the customer's location and preference.

The customer will be provided with a tracking number to monitor the shipment's progress.

The estimated delivery time will also be provided to the customer based on the shipping method and destination.

FAQ:

A: The lifting capacity of the Metallurgical crane ranges from 5 tons to 500 tons.

Q: What is the span of the Metallurgical crane?

A: The span of the Metallurgical crane ranges from 10 meters to 50 meters.

Q: What is the lifting height of the Metallurgical crane?

A: The lifting height of the Metallurgical crane ranges from 6 meters to 30 meters.

Q: What is the lifting speed of the Metallurgical crane?

A: The lifting speed of the Metallurgical crane ranges from 2 meters per minute to 20 meters per minute depending on the load capacity.

Q: What safety features does the Metallurgical crane have?

A: The Metallurgical crane is equipped with various safety features such as overload protection, emergency stop button, limit switches, and anti-collision devices.
