

Customizable Overhead Industrial Cranes For Warehouses And Factories 1-500T

Our Product Introduction

for more products please visit us on port-crane.com

Basic Information

- Place of Origin: Shandong Province, China
- Brand Name: Lucheng Co., Ltd
- Model Number: Metallurgical crane
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Increase Quantity: On Demand Customization
- Product Material: Steel Products
- Operation Form: Remote-controlled Operation
- Production Country: China
- Main Material: Q235B/Q345B Steel
- Applicable Scope: Industrial Factory Terminal
- Lifting Capacity: 1-500T
- Tonnage: Customizable
- Highlight: customizable overhead industrial cranes, customizable factory overhead crane, industrial factory overhead crane

Product Description

Product Description:

With its 3-phase AC power supply, 50Hz frequency, and 380V voltage, this crane provides the power and stability needed to lift heavy materials. It has a lifting height of 0-50m, which makes it ideal for a variety of applications. The effective lifting height of this crane is between 9-30m, providing the perfect range for most industrial factory terminals.

The Metallurgical crane is perfect for lifting and moving materials such as steel, aluminum, and other metals. It is designed to meet the demands of the metallurgical industry, which requires heavy lifting capabilities, precision, and reliability.

This crane is equipped with advanced safety features, such as overload protection, anti-collision systems, and emergency stop buttons. These features ensure that the crane operates safely and efficiently, minimizing the risk of accidents and injuries.

The Metallurgical crane is easy to operate and maintain, thanks to its user-friendly interface, intuitive controls, and easy access to key components. It is designed to provide reliable performance and long service life, reducing downtime and maintenance costs.

In summary, the Metallurgical crane is a powerful and reliable crane that is perfect for industrial factory terminals. With its strong and durable Q235B/Q345B steel construction, 3-phase AC power supply, and lifting height of 0-50m, this crane provides the power and stability needed to lift heavy materials. Its advanced safety features, user-friendly interface, and easy maintenance make it a great investment for any industrial factory terminal.

Features:

Product Name: Metallurgical crane

Power Supply: 3-phase AC, 50Hz, 380V

Types of: Metallurgical Crane

Product material: Steel Products

Effective Lifting Height: 9-30m

Production country: China

Technical Parameters:

Metallurgical Crane	
Operation Form	Remote-controlled Operation
Brand	Lucheng Co., Ltd
Product Material	Steel Products
Effective Lifting Height	9-30m
Applicable Scope	Industrial Factory Terminal
Power Supply	3-phase AC, 50Hz, 380V
Main Material	Q235B/Q345B Steel
Increase Quantity	On Demand Customization
Tonnage	Customizable
New and Old Degree	Brand New

Applications:

The primary application of metallurgical cranes is in the steel industry, where they are used for lifting and transporting heavy loads of raw materials, finished products, and scrap metal. They are also used in the production of non-ferrous metals like aluminum, copper, and zinc. Metallurgical cranes are also used in the mining industry for transportation of ore and minerals. They are also used in the construction of large infrastructure projects like dams, bridges, and power plants.

Metallurgical cranes find their use in various scenarios in the metallurgical industry. They are used in the smelting process, where they are used to lift and pour molten metal into molds. They are also used in the rolling process, where they are used to transport hot rolled steel from the furnace to the rolling mill. Metallurgical cranes are also used in the maintenance and repair of heavy machinery in the metallurgical industry.

Lucheng Co., Ltd's metallurgical cranes are designed to cater to the needs of various industries and can be customized as per the requirements of the clients. They are a perfect fit for large-scale metallurgical projects, where heavy loads need to be lifted and transported with precision. Whether it's the mining industry, steel industry, or non-ferrous metals industry, Lucheng Co., Ltd's metallurgical cranes are a reliable and efficient solution for all your heavy lifting needs.

Customization:

Metallurgical crane product:

New and old degree: **Brand New**

Does it support processing customization: **Yes**

Types of: **Metallurgical Crane**

Lifting height: **0-50m**

Production country: **China**

Support and Services:

Our Metallurgical crane product comes with comprehensive technical support and services to ensure optimal performance and maximum uptime. Our team of experienced engineers is available to provide on-site installation and commissioning, as well as regular maintenance and repair services to keep your crane running smoothly.

We also offer remote technical support through phone, email, and online tools, allowing us to quickly troubleshoot any issues that may arise and provide prompt solutions. Our spare parts service ensures that you have access to genuine replacement parts whenever you need them, minimizing downtime and ensuring that your crane is always operating at peak performance.

In addition to our technical support and services, we also provide operator training programs to help your team operate the Metallurgical crane safely and efficiently, reducing the risk of accidents and maximizing productivity.

Packing and Shipping:

Product Name: Metallurgical Crane

Package Dimensions: 10ft x 8ft x 6ft

Weight: 5000 lbs

Package Contents: 1 Metallurgical Crane, user manual, installation guide

Shipping Method: Freight

Estimated Shipping Time: 5-7 business days

Shipping Cost: Please contact us for a quote

FAQ:

A: The lifting capacity of the Metallurgical crane ranges from 5 to 500 tons.

Q: What is the maximum lifting height of the Metallurgical crane?

A: The maximum lifting height of the Metallurgical crane is up to 100 meters.

Q: Can the Metallurgical crane be used in high-temperature environments?

A: Yes, the Metallurgical crane is designed to operate in high-temperature environments up to 600 .

Q: Is the Metallurgical crane suitable for outdoor use?

A: Yes, the Metallurgical crane is designed for both indoor and outdoor use, and it is equipped with weather protection features.

Q: What type of control system is used for the Metallurgical crane?

A: The Metallurgical crane uses a PLC control system, which ensures precise and stable operation.
