

Customized Double Beam Crane For Industrial Lifting Height 0-50m

Our Product Introduction

for more products please visit us on port-crane.com

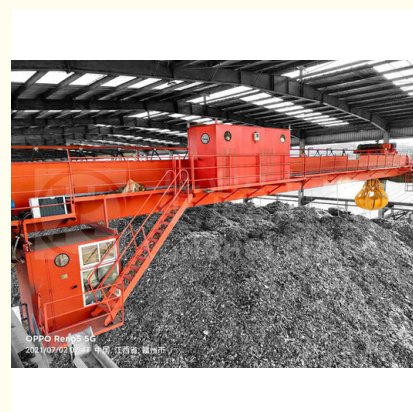

Basic Information

- Place of Origin: China
- Brand Name: Double beam crane
- Model Number: complete
- Minimum Order Quantity: 1
- Price: interview
- Delivery Time: 10-15 days shipping
- Payment Terms: L/C, T/T
- Supply Ability: 3set/week

Product Specification

- Type: Double Beam Crane
- Does It Support Processing Customization: Yes
- Increase Quantity: On Demand Customization
- Production Country: China
- Lifting Height: 0-50m
- Applicable Scope: Industrial Factory Terminal
- Operation Form: Remote-controlled Operation
- Product Material: Steel Products
- Working Class: A5-A8
- Highlight: **customized double beam crane,
customized double girder gantry crane,
industrial double beam crane**

Product Description

Product Description:

The Double Beam Crane is built for remote-controlled operation which makes it easy to operate. The operator can control the crane from a safe distance while ensuring that the lifting process is smooth and efficient. This reduces the risk of accidents and ensures that the crane can be used in a wide range of applications.

The crane is designed to be used in industrial factories and terminals. Its double beam design ensures that it can be used to lift heavy loads in a safe and efficient manner. The crane is ideal for use in applications such as shipyards, ports, and factories where heavy lifting is required.

The lifting capacity of the Double Beam Crane ranges from 5 to 500 tons. This makes it suitable for use in a wide range of applications. It can be used to lift heavy machinery, containers, and other heavy loads with ease. The crane is designed to be strong and durable, ensuring that it can handle heavy loads without any issues.

The Double Beam Crane is a reliable and efficient lifting equipment that can be used in a wide range of applications. Its double beam design ensures that it can be used to lift heavy loads safely and efficiently. It is designed for remote-controlled operation, making it easy to operate from a safe distance. The crane is ideal for use in industrial factories and terminals where heavy lifting is required.

Features:

Product Name: Double Beam Crane

Tonnage: Customizable

Operation Form: Remote-controlled Operation

Increase Quantity: On Demand Customization

New and Old Degree: Brand New

Type: Double Beam Crane

Technical Parameters:

Product Type:	Double Beam Crane
Brand:	Lucheng Co., Ltd
Tonnage:	Customizable
Lifting Height:	0-50m
Increase Quantity:	On Demand Customization
Production Country:	China
Applicable Scope:	Industrial Factory Terminal
Processing Customization:	Yes
Product Material:	Steel Products
Operation Form:	Remote-controlled Operation

Applications:

The Double Beam Crane is an ideal solution for various lifting and handling operations in industries such as manufacturing, construction, mining, and logistics. It is commonly used in the following applications:

Manufacturing: The Double Beam Crane is widely used in manufacturing plants for lifting and transporting heavy machinery, equipment, and raw materials. It is particularly useful in the automotive, aerospace, and steel industries.

Construction: The Double Beam Crane is essential for handling heavy loads on construction sites, including steel beams, concrete blocks, and precast panels. It is also used for erecting buildings, bridges, and other structures.

Mining: The Double Beam Crane is used in the mining industry to lift and move heavy loads of ore, coal, and other materials. It is also used for maintaining and repairing mining equipment and infrastructure.

Logistics: The Double Beam Crane is used in warehouses and logistic centers for loading and unloading cargo from trucks and containers. It is also used for stacking and organizing goods.

The Double Beam Crane is designed for remote-controlled operation, which allows operators to control the crane from a safe distance. This feature improves safety and reduces the risk of accidents. The Double Beam Crane is produced in China, which ensures its high quality and reliability.

In summary, the Double Beam Crane is a versatile lifting equipment that is suitable for a wide range of lifting and handling applications. Its high lifting capacity, remote-controlled operation, and processing customization make it an excellent choice for various industries.

Customization:

Double Beam Crane for your business? Our product customization services for the **Double Beam Crane** model offer you the flexibility to tailor your crane to your unique needs. Our cranes are produced in **China**, the home of high-quality

industrial equipment. We offer on-demand customization services that allow you to increase the quantity of your order as needed.

Our **Double Beam Crane** type can be customized to your desired tonnage, making it the perfect solution for any lifting task. We support processing customization, ensuring that our cranes meet your specific requirements. So why wait? Contact us today to learn more about our **Double Beam Crane** product customization services.

Support and Services:

Our Double Beam Crane product comes with comprehensive technical support and services to ensure optimal performance and minimal downtime. Our team of skilled technicians is available to provide installation, maintenance, and repair services to help keep your crane working efficiently. We also offer training services to help your personnel operate the crane safely and effectively. In addition, we provide technical support to address any issues that may arise and offer ongoing maintenance programs to keep your crane in top condition. Contact us to learn more about our product technical support and services.

Packing and Shipping:

Product Packaging:

Double Beam Crane

Assembly Instructions

Hardware and Tool Kit

Warranty Information

Shipping:

Shipping Method: Standard Ground Shipping

Expected Delivery Time: 5-7 Business Days

Shipping Cost: Free

Shipping Restrictions: Currently only available for delivery within the United States

FAQ:

What is the maximum weight capacity of the Double Beam Crane?

The maximum weight capacity of the Double Beam Crane is determined by the model purchased. Please refer to the specifications of the specific model for more information.

What material is used to manufacture the Double Beam Crane?

The Double Beam Crane is made of high-quality steel and other durable materials to ensure strength and durability.

Is the Double Beam Crane easy to install?

Yes, the Double Beam Crane is designed to be easy to install and comes with detailed instructions to guide you through the process.

Where is the Double Beam Crane manufactured?

The Double Beam Crane is manufactured in China.

What is the warranty for the Double Beam Crane?

Please refer to the warranty information included with your purchase for details on the warranty for the Double Beam Crane.
